

“Catch a Butterfly as it Flutters By”

1. Print and laminate the butterflies
2. Have kids circle around an open play area
3. Give each a butterfly net and room to swing!
4. Toss the laminated butterflies for them to catch in their nets
5. Make sure they turn their nets so that the butterfly cannot “fly out”
6. Have them pull out their catch and identify it using a field guide or ID sheet
7. As they catch and move on to an ID station other students can “rotate” in to the catching circle!
